

CENTRAL FLORIDA'S LEADING FLOATING DOCK SYSTEM

Candock Central Florida is the **leading modular floating dock system**, and Florida's coast-to-coast midstate dealer of Candock products. Our high-quality plastic, environmentally-friendly dock systems are guaranteed for 20 years and require no maintenance. Lasting 2-3 times longer than wooden, concrete, and aluminum docks, our modular floating system is quickly becoming the preferred dock choice for residential, commercial, marina, liesure, and other applications. Customizable and configurable for boat docks, liesure and recreation docks, and drive-on jet ski and personal watercraft, Candock is transforming life on the water!

CUSTOMIZABLE CANDOCK PRODUCTS THAT FIT YOUR WATER STYLE.

Candock Central Florida offers the full portfolio of Candock products to suit your watercraft and watersports lifestyle. Our plastic, foam cubes form modular solutions for boats, jetskis, personal watercraft, sailing, surfing, lounging, and more! With an easy and quick assembly, you'll be spending more time on the water and less time maintaining.

Easy to Use

Foam cubes firmly assembled together with plastic hardware

Maintenance Free

100% plastic means ZERO maintenance, year after year.

Lightweight, Sturdy, and Safe

Excellent dock stability, high load capacity, anti-skid surface

Pollution and UV Resistant

Polyethylene resin resists climate variations and UV rays

FLOAT YOUR BOAT IN ANY BODY OF WATER IN FLORIDA.

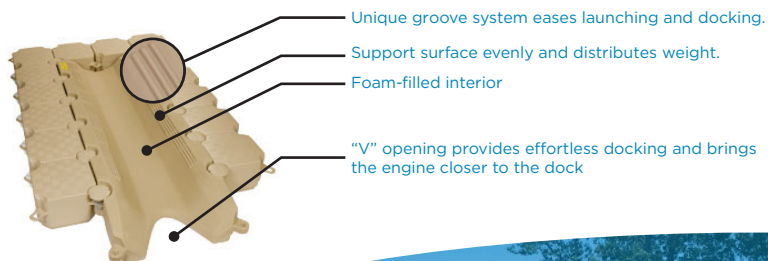

The Candock modular floating boat dock system makes docking your boat easy and fast. Pull it out of the water with our JetSlide gliding system, or create custom configurations for in-water slips.

The JetSlide is a unique patented dry dock system which protects your watercraft from shellfish and marine vegetation. It also reduces maintenance costs that accompany premature wear and tear. You can safely walk the perimeter of your boat without metal obstructions.

JetSlide is designed to evenly distribute watercraft weight, preventing excessive pressure on the hull. The JetSlide is easy to assemble with no moving parts.

Candock floating boat docks can be anchored to almost anything, including sea walls and existing docks. Safely secure your boat with our bumpers and cleats, and gain access with our gangways.

The Candock floating boat dock system, including the JetSlide is made of high-density polyethylene resin resisting damage from weather, water, and chemicals.

FLOATING DOCKS LET YOU WALK ON WATER.

With Edge Cube design, our floating modular docks create endless uses for water recreation and lounging. The possibilities with Candock floating docks are endless: swimming platforms, wedding venues, lounging dock, heliports, kayak and paddle boarding launches, diving platforms, and more!

Accessories like slides, benches, and ladders enhance relaxation and fun and our gangways and railings make accessibility a breeze. Enjoy night water fun with our solar-powered lighted cubes.

COOL YOUR JETS AND OTHER PWC WITH OUR FLOATING DRIVE-ON SLIDES.

The Candock JetRoll is a patented dry-dock, single piece drive-on system that accommodates jetskis and other personal watercraft. This rolling system protects jetskis and personal watercraft hulls from Florida's salt and brackish water, marine vegetation, and shellfish.

Easy and quick to install, your jetskis are protected from premature wear and tear, and adds an aesthetic appeal to your docking needs.

The JetRoll is fully compatible with our G2 system as well as a variety of other types of docks on the market. This MDPE unit is 100% foam-filled and almost unsinkable. Because no assembly is required, the installation is fast and hassle-free. The launching procedure of your jetski or personal watercraft is made easy thanks to the 12 urethane wheels and their customizable positions.

CHARACTERISTICS

Material/Composition
Medium-density polyethylene (MDPE)

Available colours
Grey and Beige

Dimensions
H: 30.5cm (12 in)
L: 3.86m (152 in)
W: 1.93m (76 in)

Weight
159 kg (350lbs)

STARTER KIT

BOW STOP

(2x) HOLE CAPS

COMPLETELY AUTONOMOUS

Using an already proven method; Candock's piling system, you can easily and safely install your JetRoll in a "stand alone" configuration. Shallow waters and soft sea/lake beds are the best types of environments for this configuration.

SEAMLESS TRANSITION

Using the same hardware and fundamentals as our regular floating dock system (connecting pin through threaded tabs); you can easily connect your JetRoll to an existing Candock. Anchoring a JetRoll couldn't be simpler!

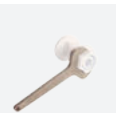

SIMPLE AND EFFICIENT

Thanks to our "Z" Bracket, you can secure your JetRoll to any fixed structure (fixed pier, sea wall, etc...). Paired with our pilings and PVC sleeves, the combination allows for seasonal or tidal fluctuations of the water level, without compromising accessibility and efficiency.

HOW THE CANDOCK SYSTEM WORKS.

ENVIRONMENTALLY FRIENDLY.

With the purchase of a Candock Modular Floating System, you're choosing an environmentally friendly solution. Our docks are made of 100% recyclable, high-quality HDPE (high-density polyethylene) resin that will not decompose or degrade. Resistant to a wide range of chemicals, our products are manufactured according to ISO 9001:2008 quality standards and the ISO 14001:2004 environmental standard.

As a testimony of our commitment towards a green, renewable, and responsible way of manufacturing and distributing our products all over the world, Candock has been awarded the ECORESPONSABLEMC certification. This certifies a partnership program between the Canadian government and major Canadian industrial companies to develop progressive methods of manufacturing.

Candock Central Florida has limitless applications and configurations for your dock needs. For more information on parts, accessories, or to get a quote, visit www.candockcfl.com.
